Batman Lunar Lander

1. **The start Screen:**
   Background: Batman standing on a roof looking towards the moon with Batman sign on it
   Text with a button: "Press ENTER to start"

2. **The actual game:**
   Batman's spacecraft descends towards the moon
   The gravity accelerates the spacecraft downwards
   The space key control the thrust of the spacecraft
   Update the y-position and velocity of the spacecraft
   if the spacecraft land safely, Batman will jump out of the spacecraft
   If the spacecraft hit the moon surface too hard then an explosion occurs

3. **The result screen:**
   Text: "Game Over" or "Mission Completed" based on the spacecraft's landing
   Text with a button: "Press ENTER to restart"
